

CraftiTunes | Master UI Documentation

Project Overview: CraftiTunes is a feature-intensive Minecraft mod designed to integrate live streaming APIs (Spotify, YT Music, Apple Music, Amazon Prime Music) directly into the game client. It allows players to access their playlists, libraries, and algorithmic suggestions without needing to alt-tab, maintaining total immersion.

1. Global Navigation Bar

The navigation bar serves as the global anchor for the entire interface, ensuring players can easily switch between their connected streaming services.

(Reference: Expanded Navbar design with text labels)

- **Positioning:** Fixed vertically on the left side of the screen.
- **Header:** Features the "CraftiTunes" title and a personalized welcoming subtitle.
- **Service Tabs:** Each streaming service features:
 - Its respective official logo.
 - Full text name for clarity.
 - A specific color-tinted background panel to differentiate them.
- **Active State:** When a service is active, its panel utilizes a glowing border or depressed button texture matching its brand color to indicate the active state.
- **Settings:** A dedicated "Settings" button with a recognizable gear icon is positioned at the bottom of the navbar.

2. Core Aesthetic & Rendering Principles

To ensure the interface balances modern music app features with the distinct functional constraints of a Minecraft GUI, all menus universally adhere to these rules:

- **Backgrounds:** The primary interface utilizes native-feeling dark, semi-transparent black and gray backgrounds.
- **Album Rendering:** All album covers and thumbnails are rendered as flat, 2D square textures, mimicking the appearance of standard Minecraft paintings or map items.
- **Hover Tooltips:** The interface strictly utilizes native Minecraft semi-transparent item tooltips (purple/black boxes) for displaying metadata when hovering over UI elements.
- **Tooltip Data:** Standard tooltips display the **Track Name**, **Artist**, and **Duration** of the hovered item.
- **Queueing Controls:** The mod utilizes a strict "Right-Click to Queue" interaction mechanic.
- **Muscle Memory:** The right-click queuing mechanic leverages standard Minecraft split-stacking control schemes for intuitive player interaction.

3. Service-Specific Interfaces

The central screen space dynamically changes based on the selected service in the navbar, maximizing real estate for rich API data while adapting to specific brand guidelines.

A. Spotify Menu Layout

Theme: Signature Spotify Green for "Play" buttons, active text, and playback progress bars.

UI Element	Minecraft Implementation	Feature Mapping
Search Bar	Long text input field at the top with a magnifying glass icon.	Direct search for tracks, artists, or albums within the Spotify database.
Header Text	Bold standard Minecraft pixel font.	Displays personalized greetings like "GOOD EVENING, [Player]".
Quick Access	A 2x3 grid of large square buttons containing small album art icons.	Holds frequently used items like <i>Top Mixes</i> and <i>Liked Songs</i> .
Recommendations	A dynamic horizontal scrollable row utilizing large, flat album covers.	Displays generated content such as <i>Discover Weekly</i> and <i>Release Radar</i> .
Your Library	A vertical scrollable list showing track counts and artist details.	Vertical view of <i>Custom Playlists</i> .

B. YT Music Menu Layout

Theme: Signature YT Music Deep Red for playback progress bars, buttons, and active highlights.

UI Element	Minecraft Implementation	Feature Mapping
Search Bar	Long text input field at the top with a deep red border.	Direct search for tracks, artists, albums, and videos within the database.
Header Text	Bold standard Minecraft pixel font.	Displays algorithm titles like "MIXED FOR YOU" or "LISTEN AGAIN".
Quick Access	A 2x3 grid of large square buttons.	Features prominent algorithm mixes like <i>My</i>

		<i>Supermix and Discover Mix.</i>
Recommendations	A dynamic horizontal scrollable row with diverse cover formats.	Displays generated content like <i>New Releases</i> and live performances.
Your Library	A vertical scrollable list.	View of saved playlists, liked music, and subscribed channels/artists.

- **Unique Feature (Video):** Video-sourced content (covers/live performances) features small, red pixelated play-button overlays on the album art as a visual indicator.
- **Unique Tooltips:** YT Music tooltips display specific channel names, video counts, and creators instead of standard artist info where applicable.

C. Apple Music Menu Layout

Theme: Signature Apple Cherry Red/Magenta for playback progress bars, active text, and "Play" buttons.

UI Element	Minecraft Implementation	Feature Mapping
Search Bar	Long text input field at the top with a subtle pinkish-red border.	Search the catalog for spatial audio tracks, artists, and lossless albums.
Header Text	Bold standard Minecraft pixel font.	Displays curation titles like "LISTEN NOW" or "BROWSE".
Quick Access	A 2x3 grid of large square buttons.	Holds <i>Top Picks</i> and <i>Recently Played</i> stations.
Recommendations	A dynamic horizontal scrollable row with large album covers.	Displays curated playlists like <i>New Music Daily</i> and <i>Stations for You</i> .
Your Library	A vertical scrollable list section.	Vertical view of <i>Recently Added</i> , <i>Playlists</i> , and <i>Made For You</i> (Replay) mixes.

- **Unique Feature (Audio Quality):** Supported album art features tiny, pixelated "Lossless" or "Dolby Spatial" icon overlays to indicate high-quality audio streams.

D. Amazon Prime Music Menu Layout

Theme: Signature Prime Cyan/Turquoise for search borders, titles, active tabs, and playback controls.

UI Element	Minecraft Implementation	Feature Mapping
Search Bar	Long text input field at the top with a cyan border.	"Search Prime Music catalog..."
Header Text	Bold standard Minecraft pixel font.	Displays text like "LISTEN NOW: PRIME SELECTS".
Quick Access	A 2x3 grid of large square buttons.	Holds specific Prime features like <i>All-Access Hits</i> , <i>X-Ray Rock</i> , and <i>Prime Station</i> .
Recommendations	A dynamic horizontal scrollable row with large album covers.	Displays <i>STATIONS FOR YOU</i> and curated Prime stations.
Your Library	A vertical scrollable list section.	Vertical view of <i>Folder Art</i> : <i>All-Access Mixes</i> and local saved content.

- **Unique Feature (X-Ray):** Select tracks/albums feature a pixelated "X-Ray" tag on the cover art.
- **Complex Tooltips:** Tooltips in Prime Music handle complex nested tags for podcasts and spatial audio variants.
